Multi-use path system master plan

City Council Retreat

March 18, 2005

Existing path infrastructure

- 84 miles of paved paths, approximately 160 miles of roads that allow golf carts for a total path network spanning 244 miles
- 10,400+ registered golf carts
- 2 bridges spanning state highways
- 17 tunnels underneath collector roads
- Interconnection between most residential, commercial, retail and recreational developments

Goals of master plan

- Interconnection of all existing and proposed developments within the City
- Extension of path system into industrial park
- Identify critical areas for bridges and tunnels and incorporate these into road design projects
- Seek grant funding assistance for path expansions
- Inventory existing system and develop phased improvement plan
- Develop realistic path extension program

Multi-use path reconstruction – FY 05
