CITY OF PEACHTREE CITY PAVING PROJECTS 2020 ADDENDUM #2

1. PRE CONSTRUCTION REQUIREMENTS - Note 1
Contractor shall perform a mix design for the FDR process for each road to verify lbs/yd² of cement required for each road to ensure that the strength of the completed cement-stabilized base course is at least 300psi.
QUESTION: If the results of the collected samples from each road can be grouped based on the material analysis, can we submit one mix design for each group of roads with the same materials?
CITY'S RESPONSE: **The Contractor can group roads based on similar material analysis for a proposed mix design. The Contractor will still be required to provide core breaks for each road and be responsible for meeting the 300 psi requirement.**
2. CURB REMOVAL & REPLACEMENT
The bid schedule indicates 200 Linear Feet of curb to be removed and replace, however the road notes only reference the curb to be removed and replace on Fox Fall at 100'.
QUESTION: What road or roads will the other 100' of curb be removed and replaced?
CITY'S RESPONSE: **See revised bid form and agreement.**
3. SPEED TABLES ON SMOKERISE TRACE
QUESTION: What are we to do with the Speed Tables on Smokerise Trace? Are we to Remove and Replace or mill up to them and resurface each side of them? If we are to remove and replace them, are we required to stamp the top and color them red?
CITY'S RESPONSE: **The speed tables are to remain. The contractor shall variable mill to them or install temporary wedges for transition purposes. See Revised Appendix B as the Notes column did not show all of the text for this street.**
4. BRIDGES ON SMOKERISE TRACE
QUESTION: Are the 2 bridges on Smokerise Trace to be milled and overlaid?
CITY'S RESPONSE: **Yes they are to be milled and overlaid. The bridges are currently overlaid with asphalt.**
5. ROADWAY PATCHING SPECIFICATION
QUESTION: Since the roads that are setup for patching are to be Overlaid with 9.5 MM, is the 2" of 9.5 MM outlined in requirement 3 the 2" Overlay course or is it an additional course in the patch area prior to overlaying the road?
CITY'S RESPONSE: **The 2" of 9.5MM in requirement 3 would be the overlay layer in the above situation.**
6. LEFT TURN LANES ON GEORGIAN PARKWAY

QUESTION: Are the left turn lanes on Georgian Parkway to be reclaimed or just milled and overlaid?

CITY'S RESPONSE: The turn lanes are to be reclaimed on Georgian Parkway.

The parties also recognize the delays, expense, and difficulties involved in proving in a legal or arbitration proceeding the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty), Contractor shall pay Owner \$200 for each day that expires after the time specified in Paragraph 4.02 above for Substantial Completion until the Work is substantially complete. After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Time or any proper extension thereof granted by Owner, Contractor shall pay Owner \$200 for each day that expires after the time specified in Paragraph 4.02 above for completion and readiness for final payment until the Work is completed and ready for final payment.
