**STORMWATER MANAGEMENT
FACILITY MAINTENANCE AGREEMENT**

THIS AGREEMENT, made and entered into this ____ day of _____, 20____, by and between _____, a Georgia resident (hereinafter called the “Landowner”) and **PEACHTREE CITY, GEORGIA** (hereinafter called the “City”).

WITNESSETH, that WHEREAS, the Landowner is the owner of certain real property described as _____, as recorded by deed in the land records of Fayette County, Georgia, Deed Book _____, Page _____ (hereinafter called the “Property”);

WHEREAS, the Landowner is proceeding to build on and develop a portion of the property as shown on Exhibit “A”;

WHEREAS, the Site Plan/Subdivision Plan known as “_____,” dated _____, and approved by the City on _____ (hereinafter called the “Plan”), which is expressly made a part hereof, as approved or to be approved by the City, provides for management of stormwater, as indicated, within the confines of the Property;

WHEREAS the City and the Landowner, its successors and assigns, including any office park or industrial park association, agree that the health, safety, and welfare of the residents of Peachtree City, Georgia, require that on-site stormwater management facilities be constructed and maintained on the Property; and

WHEREAS, the City requires that on-site stormwater management facilities as shown on the Plan be constructed and adequately maintained by the Landowner, its successors and assigns, including any office park or industrial park association.

NOW, THEREFORE, in consideration of the foregoing premises, the mutual covenants contained herein, and the following terms and conditions, the parties hereto agree as follows:

1. The on-site stormwater management facilities shall be constructed by the Landowner, its successors and assigns, in accordance with the plans and specifications identified in the Plan.
2. The Landowner, its successors and assigns, including any office park or industrial park association, shall adequately maintain the stormwater management facilities. This includes all pipes, channels or other conveyances built to convey stormwater to the facility, as well as all structures, improvements, and vegetation provided to control the quantity and quality of the stormwater. Adequate maintenance is herein defined as good working condition so that these facilities are performing their design functions. The Stormwater Structural Control Maintenance Checklists found in the latest edition of the *Georgia Stormwater Management Manual* are to be used to establish what constitutes “good working condition,” under this Agreement.

3. The Landowner, its successors and assigns, shall inspect the stormwater management facility and submit an inspection report annually. The purpose of the inspection is to assure safe and proper functioning of the facilities. The inspection shall cover the entire facilities, berms, outlet structure, pond areas, access roads, etc. Deficiencies shall be noted in the inspection report.
4. The Landowner, its successors and assigns, hereby grant permission to the City, its authorized agents and employees, to enter upon the Property and to inspect the stormwater management facilities whenever the City deems necessary. The purpose of inspection is to follow-up on reported deficiencies and/or to respond to citizen complaints. The City shall provide the Landowner, its successors and assigns, copies of the inspection findings and a directive to commence with the repairs if necessary.
5. In the event the Landowner, its successors and assigns, fails to maintain the stormwater management facilities in good working condition acceptable to the City, the City may enter upon the Property and take whatever steps necessary to correct deficiencies identified in the inspection report and to charge the costs of such repairs to the Landowner, its successors and assigns. The Landowner shall be given notice of the deficiencies identified in the inspection report so as to take the necessary corrective action. Such corrective action shall be completed within thirty (30) days of the Landowner's receipt of such notice. In the event that the Landowner cannot complete such remedial action within this time period, the Landowner shall provide a schedule for completion, which scheduled must be approved by the City. This provision shall not be construed to allow the City to erect any structure of permanent nature on the land of the Landowner outside of the easement for the stormwater management facilities. It is expressly understood and agreed that the City is under no obligation to routinely maintain or repair said facilities, and in no event shall this Agreement be construed to impose any such obligation on the City.
6. The Landowner, its successors and assigns, will perform the work necessary to keep these facilities in good working order as appropriate. In the event a maintenance schedule for the stormwater management facilities (including sediment removal) is outlined on the approved plans, the schedule will be followed.
7. In the event the City, pursuant to this Agreement, performs work of any nature, or expends any funds in performance of said work for labor, use of equipment, supplies, materials, and the like, the Landowner, its successors and assigns, shall reimburse the City upon demand, within thirty (30) day of receipt thereof for all actual costs incurred by the City hereunder.
8. This agreement imposes no liability of any kind whatsoever on the City and the Landowner agrees to indemnify and hold the City harmless from any liability in the event the stormwater management facilities fail to operate properly.
9. This agreement shall be recorded among the land records of Fayette County, Georgia, and shall constitute a covenant running with the land, and shall be binding on the Landowner, its administrators, executors, assigns, heirs and any other successors in interests, including any office park or industrial park association.
